

Dear friends & ship comrades

Let me to invite you for

PRESENTATION OF ILLUTRON COLLECTIVE

by

Christian Liljedahl

Mo 10th November 2014 18h

Eleonore Ship, Am Winterhafen 26

Illutron is collaborative, interactive art studio based on a big, old ship in Copenhagen. So naturally a lot of the art works they done are sailing, floating, sinking, rising - related to the water element in various ways. They often build interactive physical installations that typically have both a performative and interaction layer. Often using machines, industrial components, fire, electronics etc.

This is the beginning of our new mission to connect & collaborate more intensively with other artists and art - cultural collectives based on ships, harbors, rivers and seas around Europe.

Looking forward to see you aboard

See following invitation for details about

workshop 13 -14th November !
